Bernkasteler Johannisbrunnchen Riesling Eiswein Dr. Heidemanns-Bergweiler/Berncastel-Kues - Germany

Terrior	The Johannisbrunnchen is a part of the Bernkasteler Badstube (translated it means something like „the roman spa of Berncastel). The main soil type in the Bernkasteler Johannisbrunnchen is a medium-deep clay-slated residual soil having varying parts of loam and stone mineral content. In some areas one encounters pure slate having a high mineral content. Due to high elevation we have lower average temperatures than in most vineyards.
Description	The Bernkasteler Johannisbrunnchen Riesling Eiswein has a clean, fresh taste, with racy, lasered overtones of candied citrus, dried apricots and smoky minerals. The finish is crisp and tangy.
Suggestion	Pair this wine with all kind of sweet deserts (Crème Brulée, Ice cream, fruits). It is also well suited as an aperitif.
Quality Level	Eiswein
Varietal	100 % Riesling

We say:

„Harvested in the coldest morning of the year, this noble sweet Riesling is an awesome companion for any kind of desert and reminds us to the hard work in the vineyard and why we do it!”
